Subject Saseno Island  No. OF PAGES 3 50X1-  No. OF FINCLS.  GUITRED COURTED  NO. OF ENCLS.  GUITRE BELOW.  NO. OF ENCLS.  GUITRED Supplement to 50X1-  REPORT NO.  THIS IS UNEVALUATED INFORMATION  THIS IS UNEVALUATED INFORMATION  THIS IS UNEVALUATED INFORMATION  50X1-  1. On the northern tip of the island there is a tumker in cement, cylindric in shape, with horizontal openings, on top of which a telemeter can be seen. Two low buildings, used as turncks, are located nearby; about 20 soldiers increased there  2. Two gums, of a caliber not less than 80/90 mm, are emplaced on the top of the hill which dominates the northern caps; their burnels can be seen above the level of the rocks.  3. On the western slope of the mountain, which is located south of the "Informo Valley," there are three anti-aircraft gums of a caliber not less than 80/90 mm,—also located on this alope is a double barrelled machine gum (or possibly a small cannon), the caliber of which is approximately 40 mm. The muzzles are quipped with flash shields.  4. A rocky ridge extends in a westerly direction over the top of the rountain Which dominates the southern they of the island. Three artillery pieces about 150-200 mm, are emplaced vertically, one above the other, along the ridge. Pehind each piece there is a well set up in a north-south direction, and a small protective wall is built around each piece. A little further to the north there is another similar artillery diece, enclased on a slightly lower grade; it has a circular protective wall, tut there is no well behind it.  all the gums, with the exception of that emplaced at the highest level, were covered with canouflage nets. Small pathways lead from sox1-HUM  5. On the top of the pountain, immediately above the gums, there are the		50X1-HUM	CD NO.	m'e <i>∞</i> ∿9 <i>2</i> 2	- VS- II VI	~ ~ E = ## # T			<b>~1 1 N 1 ~</b> ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~
ATE OF  1. On the northern tip of the island there is a bunker in cement, cylindric in shape, with horizontal openings, on top of which a telemeter can be seen. Two low buildings, used as burnerage, are located enoughly about the hunker.  2. Two guns, of a caliber not less than 80/90 mm, are emplaced on the top of the hill which dominates the northern caps; their barrels can be seen above the level of the rocks.  3. On the western alope of the mountain, which is located south of the "Informo Valley," there are three anti-nicrart guns of a caliber not less than 80/90 mm, are emplaced on the top of the National South of the "Informo Valley," there are three anti-nicrart guns of a caliber not less than 80/90 mm, are emplaced on the seen above the level of the mountain, which is located south of the "Informo Valley," there are three anti-nicrart guns of a caliber not less than 80/90 mm, are emplaced on the vestern alope of the mountain, which is located south of the "Informo Valley," there are three anti-nicrart guns of a caliber not less than 80/90 mm, are emplaced on the vestern south of the "Informo Valley," there are three anti-nicrart guns of a caliber not less than 80/90 mm, are emplaced on the vestern south of the "Informo Valley," there are three anti-nicrart guns of a caliber not less than 80/90 mm, are emplaced on the sollow of the information which is approximately 40 mm. The muzzles are equipped with flash shields. 50X1-HUM  4. A rocky ridge extends in a vestorly direction over the top of the rountain which dominates the southern tip of the island. Three artillery pleces about 150-200 mm, are emplaced vertically, one above the other, along the ridge. Fehind each plece there is a well set up in a north-south direction, and a small protective vall is built around each plece. A little further to the north there is another similar artillery viece, emplaced on a slightly lower grade; it has a circular protective vall, thut there is no well behind it.  2. On the top of the Fountain, imrediately above the guns		0 Oct. 1951				Can Zan Go			
ATE OF FIG.  SUPPLEMENT TO SOX1- REPORT NO.  THIS IS UNEVALUATED INFORMATION  THIS IS UNEVALUATED INFORMATION  THIS IS UNEVALUATED INFORMATION  TO the northern tip of the island there is a tunker in cement, cylindric in shape, with horizontal openings, on top of which a telemeter cen be seen. Two low brildings, used as barracks, are located nearby; about the tunker.  2. Two gums, of a caliber not less than 80/90 mm, are emplaced on the top of the hill which dominates the northern cape; their horrels can be seen above the level of the rocks.  3. On the western slope of the mountain, which is located south of the "Inferno Valley," there are three anti-aircraft guns of a caliber not less than 80/90 mm, are emplaced on the top of the shall only a small cannon), the caliber of which is approximately 40 mm. The muzzles are guipped with flash shields.  4. A rocky ridge extends in a westerly direction over the top of the rountain which dominates the southern tip of the island. Three artillery pieces about 150-200 mm, are emplaced vertically, one above the other, along the ridge. Fehind each piece there is a well set up in a north-south direction, and a small protective vall; is built around each price the rountain, which cannother is another similar artillery nices, emblaced on a slightly lower grade; it has a circular protective vall, tut there is no wall behind it.  all the guns, with the exception of that emplaced at the highest level, were covered with comouflage nets. Small pathways lead from each individual gun to the top of the mountain.	K1-HUN	<b>3</b> 50)	NO. OF PAGES				land	Saseno Is	JOJEUI
THIS IS UNEVALUATED INFORMATION  1. On the northern tip of the island there is a bunker in cement, cylindric in shape, with horizontal openings, on top of which a telemeter can be seen. Two low buildings, used as barracke, are located nearby; about 20 soldjers were seen there  2. Two guns, of a caliber not less than 30/90 mm, are emplaced on the top of the hill which dominates the northern caps; their barrals can be seen above the level of the rocks.  3. On the usstern slope of the mountain, which is located south of the "Inform Valley," there are three anti-aircraft guns of a caliber not less than 80/90 mm.—also located on this alope is a double berrelled machine gun (or possibly a small cannon), the caliber of which is approximately 40 mm. The muzzles are quipped with flash shields.  4. A rocky ridge extends in a westerly direction over the top of the nountain which dominates the southern tip of the island. Three artillery pieces about 150-200 mm, are emplaced vertically, one above the other, along the ridge. Fehind each piece there is a uell set up in a north-south direction, and a small protective wall is built around each piece, A little further to the north there is another similar artillery pieces, emplaced on a slightly lower grade; it has a circular protective wall, but there is no wall behind it.  all the guns, with the exception of that emplaced at the highest level, were covered with comuringe nets. Small pethways lead from south individual gun to the top of the mountain.  5. On the top of the Fountain, immediately above the guns, there are the southern the protective wall as there are the each individual gun to the top of the mountain.			NO. OF ENCLS. 	,	-		

50X1-HUM

- 18. On the top of the hill which dominates the northern tip, and runs along the entire western coast of the island, there is a small elearing on which there are 6-7 walls, each about 7x9 meters in size, which are situated, in an east-west direction, 10 meters apart. Other similar walls are also located on the alopes of the mountain which dominates the clearing, and which has signalling equipment on top.
- 19. Four gums, of a caliber not less than 150 ms., are emplaced in the clearing immediately in front of four of the walls mentioned; a small, stirrup—shaped protective wall is built around each gum, and all the gums, as well as the walls behind them, are covered by camouflage nets, from which the muzzles of the gums emerge. These are covered with caps, which are fastened with three buckles.
- 20. On the western edge of the clearing described above, where the coastal battery is emplaced, there are two machine gums.
- 21. There are two buildings in "Inferno Valley," on top of one of which can be seen three antennas; a line of electric poles reaches the building, and two radio-telegraphic antennas are located near the second building.

  50X1-HUM
- 22. There are no submarine caves or bunkers in the entire perimeter of the island.
